INVITATION TO PARTICIPATE IN "INNO PANORAMA 2021"

On 26-28 August 2021

Agriculture Academy of Vytautas Magnus University
Universiteto str. 10B, Akademija, Kaunas distr.

The main theme of the exhibition is **digital technologies in agriculture and forestry**.

We invite your company to:

➢ **participate in a physical and virtual exhibition**
We invite companies and organizations that offer automation processes and technologies for precision agriculture, smart land reclamation and other agricultural processes; GPS systems; robots; drones and other digital technology innovations; artificial intelligence relevant to agriculture and forestry.

➢ **make useful contacts**
INNO PANORAMA 2021 is designed not only to present innovations to their future users, but also to establish useful contacts and strengthen scientific and business partnerships.

➢ **demonstrate digital technologies in practice**
We will create convinient conditions to demonstrate in practice the potential for the application of digital technologies in agriculture and forestry.

➢ **present the company's good practice at the conference**
During the exhibition, a conference "Solutions for Regional Development" will be held with one of the main topics of Digitalization in Agriculture. If you have successful experience in the implementation of digital solutions and want to share some good practices, we invite you to become a conference speaker.

➢ **watch the performances of drones**
Together with the exhibition, drone competitions will be held. Demonstrations of the use of data from drones in agriculture will be waiting for visitors as well as presentations of equipment. Younger guests will also have an opportunity to enjoy the interactive educational programme. The particular event is organised by Public Institution Rural Business and Markets Development Agency.
